### Solomon Islands Country Specific training

The Cyber Safety Pasifika Team completed the first country specific Awareness and Education training in Solomon Islands from 3—5th of December 2019.

The Royal Solomon Islands Police Force (RSIPF) now have 25 trained presenters located across Honiara and seven of the nine provinces.

AFP Commander John Tanti opened the course stating “This will be the first country specific course delivered for the CSP program. We believe that it will allow for greater contextualisation of the Awareness and Safety presentations and help to build a team and camaraderie amongst you as attendees for the delivery of the online safety message to the wider Solomon Islands.”

“The CSP program relies on external Pacific trainers, however we are hoping that some of you might want to become trainers for this program and assist Cyber Safety Pasifika in delivering this program around the Pacific.”

The CSP team would like to thank all trainers for the good news stories supplied to date. Please ensure for statistical purposes you are logging onto the CSP Website (<http://www.cybersafetypasifika.org/>) and submitting your course report.

# CSP School Awareness and Education Presentation in New Caledonia

"Friday, September 13th, 2019, was the day reserved for the primary class on the horse racing Henri Millard in NOUMEA. This day was a great success for children, and for this event Cyrielle JOSEPH, formed by the Cyber Safety Pasifika took the opportunity to talk about the dangers of the internet.

This day in the form of workshops helped to educate children about the dangers of the Internet but also living together, ecology, biodiversity.

She was accompanied by her colleagues from the area police station who were trained by the French police academy to do preventive actions in schools".

Story by Captain RAVEL New Caledonia Police Force

# CSP School Awareness and Education Presentation in Nauru

CSP Nauru Team; delivered the Internet/ Technology and Student presentations to the Nauru College on 12<sup>th</sup> November 2019.

The students are aged between 12 – 14 years. The team was actually supposed to deliver the program the day before but due to other commitments tasked the students to bring with them questions and answers for the next day to be addressed with the team.

During both presentations the student body was well represented by those students who actively participated in the question answer activities. The focus of the delivery was information sharing where not only the students are learning from the team but vice versa.

For example; there are far more apps being used by the students than would normally be found with average Nauruan adult.

One particular question asked by a student was whether Internet is an advantage or disadvantage. The message by the team is; neither outweighs the other. It is all about respecting oneself and others.

Respect cannot be found in another's pocket so don't go looking there. It's always been in your pocket and nobody can take it away from you but you. It's also about making the right choices and no one can do that better, than you, for you.

All we can say is Be Safe, Be Smart and have fun online.

# Pacific Cyber Security Operational Network—PaCSON

A regional approach to managing cyber security challenges has been implemented with the formation of the Pacific Cyber Security Operational Network (PaCSON) initiative in May 2018.

PaCSON is a community of regional cyber security and incident response experts who cooperate and collaborate on best practice, information sharing and capacity development for the Pacific region. To achieve this, PaCSON members work together to develop collective cyber security incident response capabilities; enhance technical skills and knowledge; share cyber security threat information; and reflect best practice in order to strengthen our cyber security defences.

The inclusion of PaCSON Members at the Cyber Safety Pasifika Cybercrime Investigation training in February and April 2019 was an important step towards strengthening linkages and relationships between cyber security and cybercrime experts in the Pacific.

The PaCSON Community in 2019-20 is focused on further capacity building and awareness raising activities.

Membership to PaCSON is open to all nations of the Pacific. The founding members of PaCSON are: Australia, Cook Islands, Fiji, Kiribati, Marshall Islands, New Zealand, Niue, Palau, Papua New Guinea, Samoa, Solomon Islands, Tokelau, Tonga, Tuvalu and Vanuatu.

PaCSON welcomes new members from the Pacific. If you are interested in learning more about PaCSON initiatives or would like to be considered for membership, please contact the PaCSON Secretariat –

[pacson.secretariat@defence.gov.au](mailto:pacson.secretariat@defence.gov.au).

## CSP Collaboration with Plan International

Plan International Australia is partnering with Cyber Safety Pasifika to undertake baseline research into young people’s perceptions on cyber safety in the Pacific, specifically Solomon Islands, Kiribati and PNG, including some targeted recommendations for the AFP in how they implement their Cyber Safety Pasifika program with Pacific police forces.

Through this work, the Cyber Safety Pasifika team have recognised that there is a lack of baseline data beyond known policing issues, and that whilst the current Cyber Safety Pasifika’s awareness program raises knowledge, there is a gap in terms of behaviour change, particularly in regards to adolescents and young people.

The report will be available in August 2020.

## CSP School Awareness and Education Presentation in Palau

These are some of the awareness we did the last few months. We did some with the communities but most especially students.

We are becoming more aware about cyber safety yet there been cyber crimes but i guess the legislature of our Island need help to make the laws about cyber crime so we can enforce.

# CSP School Awareness and Education Presentation in Tuvalu

Motufoua Secondary School (MSS) Form 3's Student; On the 7th June 2019, the CSP programs was delivered to all Motufoua Form 3 students and their teachers here in Funafuti.

The presentation was based on the student level presentation which focus on cyber bullying, respect, strong password, settings, Apps and stay safe online.

The students were very interested in the presentation and asked a lot of questions after the presentation. There were students shared their experiences in relation to the topics covered.

Students were asked with some questions by facilitators to check their understanding of the topics covered in the presentation and the CSP giveaway items were given out to those who answered correctly.

Fetuvalu Secondary School (FSS) Form 3's – 6's & Teachers;

The CSP awareness program for FSS students and teachers was held on the 14th June 2019. The presentations prepared for students and teachers were different according to the level specified under the CSP.

The awareness was conducted separately in all forms starting from Form 3s up to Form 6s and teachers.

The topics covered were including stay safe online, cyber bullying, respect while online, create stronger password, protecting emails and using different Apps.

There were 8 teachers available to attend the training at this time and the training encouraged teachers to be responsible in looking after their students when using internet during school hours.

Teachers were given the opportunity to ask questions if they need more explanation on topics covered. They were also tested by presenters by asking some questions for them to answer to test their level of understanding.

Pamphlets were also distributed for them to read and understand more on cyber safety.

Therefore, the whole idea of the training is for participants to be aware of how they use the internet securely, carefully and safely with respect.

This photo was taken during the FSS student and teacher's presentation on the 14th June 2019.

The teachers were very cooperative and willing to learnt and continue to develop more cyber awareness programs to school students.

# CSP Awareness and Education in Santo, Vanuatu

Monday 2 December VPF and Volley4Change had the final tournament for the year. Six teams, each with six participants took part in the tournament including police women and mamas from the local communities.

At the conclusion of the tournament Commander North, A/Assistant Commissioner Sam Samson delivered an Awareness presentation to the participants, their children and more than 20 VPF officers. He talked about personal safety over the Christmas period and provided information about police and community services available to help in times of need.

Merchandise from Australian Federal Police with Cyber Safety and Ending Violence Against Women was handed out to everyone at the event. VPF catered with light refreshments and the opportunity to participate in Zumba.

# CSP Awareness and Education in Solomon Islands

Below are some photos of an awareness I conducted on CSP to a local community in East of Honiara City last night.

There was a total of 30 people attended. 23 of them are children from the age of 4 to 20 years and the rest are adults.

The attendants mostly students of schools nearby are very happy to attend the student awareness and reiterated that the information's received has helped them to understand the benefits and challenges of social networking on the internet.

One of the parents who attend has also request police to conduct such related awareness to all the parents within the community.

*Story by Solomon Islands Police S/Sgt Polycarp Taloania*

# CSP Awareness and Education in Vanuatu

October 2019 the Cyber Safety Pasifika team attended the Port Vila Rodeo.

CSP merchandise was handed out to the community. The tent was manned by CSP and Crime prevention members.

## Cyber Safety Pasifika — 2019/20 Upcoming Activities

Train the Trainer - Awareness and Education		
15th —17th October 2019—Fiji (Previously Solomon Islands) <b>COMPLETED</b>	3rd - 5th December 2019—Country Specific Solomon Islands <b>COMPLETED</b>	10th—12th February 2020— Vanuatu

Tier 1 Cybercrime Investigations	Tier 2 Cybercrime Investigations
21—23 August 2019—Fiji <b>COMPLETED</b>	26—30 August 2019—Fiji <b>COMPLETED</b>
15—17 October 2019—Fiji (Previously Solomon Islands) <b>COMPLETED</b>	25—29 November 2019—Samoa <b>COMPLETED</b>
20 - 22 November 2019—Samoa <b>COMPLETED</b>	20—24 April 2020—Vanuatu
3 - 5 February 2020—Tonga	18—22 May 2020—Palau

### Important Reminders

#### *Success Stories*

After completing CSP Awareness and Education training at a school or in the community please ensure you contact Ms Kellie Keys via email with the below information:

- I. When the training was delivered, how many people participated and the gender split
- II. Good news stories with photos for the newsletter

#### *Don't forget!*

The Outreach Program is available for use. This program is to provide the opportunity for CSP Trainers to submit a business case for things such as:

- I. Travel to remote locations in their countries to deliver community awareness presentations.
- II. Purchase equipment or in country marketing material to assist the delivery of CSP Awareness Safety message and presentations.

#### **Facebook**

CSP now has a Facebook page for the CSP Awareness Trainers. This is a closed group for the CSP Awareness trainers only. If you have a Facebook account please look up CSP Awareness Trainers and join the online conversation on the great work everyone is doing.

# Merry Christmas

*The Cyber Safety Pasifika team would like to thank you for your continued support throughout 2019. We look forward to continuing the partnership in 2020.*

*The CSP team would like to wish you and your family a Merry Christmas and all the best of luck for the New Year.*

*Warm regards*

*The CSP Team*
